Subject: RE: Sen. Rubio Request for Meeting with Aqua Sciences

We have entered into a CRADA with WaterGen and currently have one of their systems at our Cincinnati labs for testing. The initial inquiry for conducting the assessment of WaterGen's technology came from the Administrators Office (Albert Kelly was the POC on that). We sent out an announcement through various channels looking for other vendors interested in collaboration, but have been unsuccessful to date. We (ORD) would be very interested in speaking with AquaSciences about collaborations; Mike Nye from my division has taken the lead on reaching out to other vendors and would be glad to follow up on any specific contact information you can provide. In addition, if the representative from AquaSciences wants to meet with EPA during his DC visit in Feb, I have cc'ed Mr. Kelly from the administrator's office who, as I mentioned earlier, has been the EPA lead on this technology.

Hi Sam,

Jay Garland in NERL may be doing work in this area. I'd recommend checking in with him about it. We haven't written anything about it because last I heard, this work seemed to be more in the initial conceptualization stage.

I'm copying Brad Autrey in case he knows more.

Subject: FW: Sen. Rubio Request for Meeting with Aqua Sciences

Hey Michelle and Emily,

A company in Sen Rubio's district requested a meeting with EPA. They are generating water from the atmosphere. I'm guessing their main concern is funding (so I'll send some SBIR info their way), but I was wondering if we have any experts on this. Lahne suggested it could be part of the water reuse/water capture stuff, but wasn't sure. Do you know of any work we're doing in this area/any experts that could provide useful technical information to the company?

Let's ask Emily Smith and Michelle Latham - I am not sure how in depth the water reuse program goes into water capture.

I feel like it could be part of that, but might not be broadly one of our areas yet, but water reuse IS!

Perhaps we could share the water reuse info though anyway.....

Do we have any folks that do stuff on generating water from the air? I doubt it, but thought I'd ask. (I think all we can really do is just send them SBIR info.)

Sam,

Can you forward this request onto the right POCs in ORD to set up a meeting with these constituents? Please see the email below.

Thanks,

Christina – please take a look at the request below for someone at EPA to meet with a Rubio constituent on their technology. We checked with OW and it looks like this is

more of an ORD topic. Thoughts? Thanks,

Sven

Subject: RE: Sen. Rubio Request for Meeting with Aqua Sciences

Hi, Sven –

After checking into this, it's not an OW-specific program issue. Rather, it's a R&D concept for a technology that would generate water out of the atmosphere. As Sen. Rubio's staffer indicates, Water-Gen has already established a working connection with EPA – specifically with ORD. Thus, since Aqua Sciences has the same technological idea, they too should approach ORD directly. Can you send this meeting request on to Christina's team?

For your/Christina's benefit, I understand that the main POCs on the Water-Gen interaction are with ORD-HERL, specifically Tim Watkins and Jay Garland in RTP. Not sure who in HQ is best.

Thank you

Denis

Subject: Meeting for drinking water solutions

Gentlemen:

We have two companies based in Florida that have different technologies for collecting potable water from the atmosphere that are exploring potential contract opportunities with the U.S. government. They have asked our office for assistance in connecting them with appropriate contacts within various federal agencies who would be able to meet with them so they can outline the benefits and performance of their technologies and see if there were potential opportunities to work to further the agency mission. The companies are Water-Gen (whom I believe has already secured meetings with EPA) and Aqua Sciences (who has not).

One of the lead investors for Aqua Sciences will be in town the week of Feb. 5th, and would like to meet with the appropriate folks from EPA during his trip to DC. Is there any way to help arrange that? What would be the best way to proceed?

Best regards,

Wes
